

Geological Representative (Ontario)

You wish to be a part of a team of professionals that offers numerous challenges...then join our team.

Photonic Knowledge inc. is a **dynamic enterprise** in full expansion that has developed a unique and unprecedented technology which permits the analysis of mineralogical and lithological drill cores. With the aid of our **unparalleled technology** of hyper spectral imagery and with our mobile laboratories, Photonic Knowledge Inc. has set itself apart from the competition in permitting mining companies to instantly obtain a high level of information which is precise and at a low cost. Our technology has revolutionized the process of geological analysis.

Description of Position

As a representative of our company, in Ontario, you will participate in the business development in this province (region). Your mandate will be to maintain a high level of quality service when contacting our existing and potential clients, in addition to performing "follow up" calls to ensure our clientele's overall satisfaction. You will likewise act as representative during the geological events and expositions.

The desired candidate holds a University level of instruction in Geology or in a field pertaining to or otherwise connected to. All combinations of instruction and experience will be considered. You are recognized for your credibility, communication skills and the quality of your English. You are comfortable in public speaking and appreciate team work.

We are flexible as to the location of your headquarters and you will be required to travel on a regular basis.

We will take a genuine interest in your resume which you will forward to us, no later than, **January 3rd, 2012** to the following email address:
